Executive Summary

Title IX and You: Protecting Your Campus Learning Module Accessibility Conformance Report

Access Ingenuity's evaluation of the Title IX and You: Protecting Your Campus learning module identified accessibility features and functionalities of the learning module. This evaluation provided the information required to assess the conformance of the Title IX and You: Protecting Your Campus learning module with the Revised Section 508 Accessibility Standards and WCAG 2.1 Accessibility Guidelines. Based on our evaluation, Access Ingenuity concludes that the learning module *Supports* these requirements with the exception of text spacing.

Access Ingenuity, an independent authority in web accessibility, has evaluated the Title IX and You: Protecting Your Campus learning module and certifies it to be substantially conformant with Level A and Level AA of the Web Content Accessibility Guidelines version 2.1. All conformance issues that pose a significant barrier for users with disabilities have been addressed.

Access Ingenuity cannot verify the conformance of content changed after the date of our evaluation. However, based on our interactions with United Educators, Access Ingenuity is confident in their efforts to maintain a substantially conformant product.

The Information Technology Industry Council (ITIC) has published recommended language to be used in completing Accessibility Conformance Reports (ACRs) that has been designed to create simplicity and uniformity/consistency in ACRs presented by a variety of suppliers. In preparing the Title IX and You: Protecting Your Campus learning module ACR, Access Ingenuity has used the ITIC-recommended *VPAT 2.5 508* format with the addition of WCAG 2.1 requirements.

Based on this evaluation and information published on the ITIC website (<http://www.itic.org>), Access Ingenuity presents the ACR for the Title IX and You: Protecting Your Campus learning module on the following pages.

United Educators Accessibility Conformance Report Revised Section 508 Edition

(Based on VPAT® Version 2.5)

Name of Product/Version: [Title IX and You: Protecting Your Campus](#)

Report Date: September 18, 2024

Product Description: Web-based e-learning module for understanding Title IX and combating sex-based discrimination at institutions.

Contact Information: accessibility@ue.org

Notes: This course was created in Storyline, which contains accessibility barriers that are not author-controllable. United Educators has filed bugs with Articulate (Storyline) to try and address any outstanding issues.

Evaluation Methods Used:

Conformance to the listed accessibility standards was evaluated between September 3-18, 2024, using a combination of static analysis tools and manual testing with assistive technologies.

The evaluation was conducted in the following desktop operating systems and browser/screen reader combinations:

1. Windows 11:

- a. Chrome 128/JAWS 2024
- 2. Mac OS 12.7.1:
 - a. Safari/VoiceOver

The accessibility assessment was executed per the following steps:

- I. A sighted accessibility expert conducted an overall technical analysis to identify issues of technical compliance that would affect mobility-impaired, deaf/hearing impaired, and low-vision users. The evaluator inspected the web pages using Chrome and the Chrome Developer tools as well as the axe DevTools extension.
- II. Keyboard accessibility analysis (for mobility and physically challenged users) was conducted by attempting to thoroughly navigate the web pages through the keyboard, without using a mouse.
- III. The accessibility for low-vision users was evaluated two ways: (1) using the resizing capability offered by the browser, and (2) using Colour Contrast Analyser (CCA) Version 3.5.1.
- IV. If videos were present, they were assessed for proper captioning for deaf and hard-of-hearing users as well as the need for audio descriptions and transcripts for screen reader users.
- V. Screen reader testing was conducted by an expert screen reader user. The goal was to identify accessibility barriers that are likely to be experienced by users who are blind.

Any usability issues for users with disabilities encountered during the accessibility assessments were also noted.
